

## 10<sup>th</sup> step for Laboratory Accreditation of BLA-DSS, Thailand

On the anniversary day, a seminar was held with about 300 participants from the accredited laboratories, the regulators and the laboratories' customers. The main purpose of this seminar was to promote the benefits of accreditation, the use and usefulness of accreditation logos on test reports and information about the ASEAN Community goal in 2015: where there is a free flow of goods, services, investment, and a free flow of capital, there is equitable economic development. At that time exporters should look for accredited laboratories for testing the quality of products.

To promote the benefit of accreditation and celebrate the 10<sup>th</sup> Anniversary of BLA-DSS, awards were given to three accredited laboratories as best continuous improvement organizations. The first award went to Environmental Laboratory, Environmental Quality and Laboratory Division, Pollution Control Department, the second was provided to Bangkok Food Products Laboratory and the last was given to TEST TECH CO., LTD.
